

## Printer Sharing :-

Printer sharing is the process of allowing multiple computer and connected to the same network to access one or more printer. Each node or devices on the network can print any shared printer.

## Printer sharing steps :

### ① Step ① : Install the printer

Click start ⇒ Devices and printer ⇒ Right click [model name] and then click printer properties  
open the sharing tab and sharing this printer and click ok.

### Step ② : Click Start ⇒ Control Panel ⇒ network and internet

Click network and sharing center

Click change advance sharing setting.

Click Start ⇒ devices and printer

Click add a printer

Click Add a network wireless or bluetooth printer.

Brother Properties

General **Sharing** Ports Advanced Color Management Security Device Settings

If you share this printer, only users on your network with a username and password for this computer can print to it. The printer will not be available when the computer sleeps. To change these settings, use the [Network and Sharing Center](#).

☒ **Share this printer**

Share name: **brother**

☒ **Render print jobs on client computers**

**Drivers**

If this printer is shared with users running different versions of Windows, you may want to install additional drivers, so that the users do not have to find the print driver when they connect to the shared printer.
